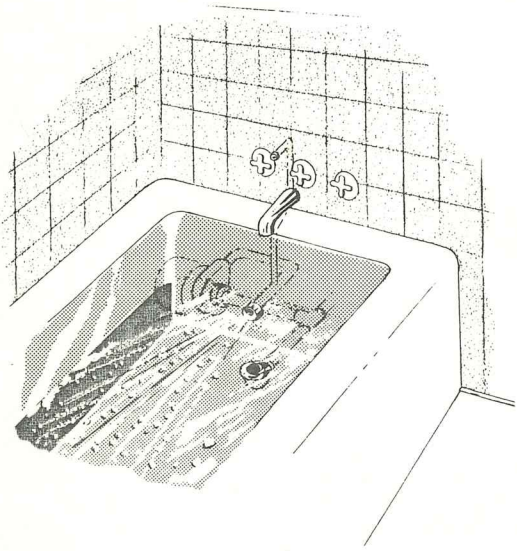
HERE ARE THE ANSWERS

Hy-PATH RESTORATIVE BATH

.....to the questions you have been asking
about the HY-PATH Restorative Bath



This message has been prepared to answer the questions you have been asking about the

HY-PATH

RESTORATIVE

BATH

607/85
1 set
3 pcs

1. WHAT IT IS ...

The HY-PATH Restorative (Aerated) Bath employs a new method (patent applied for) of circulating fresh air and water under pressure in your tub while you are bathing.

The only visible items in the HY-PATH system of aerating are the chrome plated nozzle inside your tub, a small air intake on the bath room wall, and a wall-mounted switch.

THERE IS NO UNSIGHTLY MACHINERY INSIDE YOUR TUB AS WITH OTHER SYSTEMS, since the HY-PATH is permanently installed. There are no visible pumps, hoses or wires. Once your tub is filled with water to the desired level, you have only to flick the wall switch to start the circulating and aerating action.

2. WHAT IT DOES ...

The HY-PATH Restorative Bath (called the hydropathic massage by the medical profession) provides relief for tired, tense, or aching back, leg and arm muscles.

Besides the hydropathic health benefits the HY-PATH system can provide, TRY IT FOR SHEER RELAXATION!

..... If you're as healthy as a professional football player, you'll love the HY-PATH. Children especially like it for its "bubbley feeling". And while they are enjoying the feeling of aerated water, they are also getting hydropathic health benefits.

3. HOW IT WORKS ...

Your bath water is combined with fresh air and forced at high speed-by way of a motor-driven pump-through an aerating nozzle placed slightly above the bottom of the tub.

The bath water is drawn from the tub through the outlet, passes through the motor-driven pump, and is ejected back into the tub through the aerating nozzle. Fresh air is taken in through the wall-mounted air intake. THE AIR INTAKE IS ADJUSTABLE ... you aerate the water to your liking while bathing.

Further, the HY-PATH system does not interfere in any way with normal use of the bath tub.

4. HOW TO SECURE THE HY-PATH BATH SYSTEM ...

HY-PATH INC. will furnish engineering drawings, bill of materials, and complete instructions for installation and operation. A license will also be furnished, at a nominal charge, by HY-PATH for installing the system.

The actual installation can be made by any competent tradesman. The installer, however, should be familiar with local building codes.

RESTORATIVE BATH

October 10, 1962

Mr. Simon Broder
1463 Primrose Road, N.W.
Washington 12, D.C.

Dear Mr. Broder:

Replying to your request for further information, enclosed is a brochure describing our HY-PATH bath system.

There are profits for you in the material sales as well as the labor involved in the installation of this system.

A license discount will be also allowed to qualified contractors.

There are, no doubt, countless prospects in your territory.... and it makes no difference whether they are building or in existing construction.

Please write and give us the number of additional brochures you'd like, to help you sell this profitable, widely accepted system.

Sincerely,

HI-PATH, INC.

E. D. Sperry
